

At home outdoors

Weather resistant and secure

Benefit from our strengths

At home outdoors – with SiLine®

A diversity of food and non-food items can be dispensed from SIELAFF's SiLine® Outdoor vending machines. Extremely reliable, secure, hygienic and without restricted opening hours. Whether it be a light snack or a spontaneous purchase out-of-hours, SIELAFF's Outdoor machine range has the ability to supply a diverse range of products.

SiLine® Outdoor machines still offer the modern features of the indoor machines in the SiLine® range and their only requirement is a power supply – they can literally be installed in a field.

Superbly equipped these variants fulfil the requirements of IP24 protection classification for outdoor use and are weatherproof from -20 °C to +41 °C at up to 75 % relative humidity.*

Discover new sales opportunities, rise to the requirements of your customer and increase your turnover with SiLine® Outdoor vending machines from SIELAFF.

Sales 24/7

Business can operate 24 hours a day, seven days a week – straightforward and without additional personnel costs. Even the smallest of sites can generate considerable turnover.

Invest in the future and use SiLine® outdoor machines for a diverse, secure and contact-free supply solution in all areas of public life. For residents in rural areas our SiLine®-Series of outdoor machines provide the perfect way of supplying local goods.

Locally produced goods can be supplied to the consumer out of hours. Increase turnover and sales opportunities without additional personnel investment.

Flexibility and security

SIELAFF's outdoor variants showcase products to perfection. The internal cabinet of the SiLine® Snack und Combi can be divided into two different temperature zones to ensure that all types of products are delivered at just the right temperature.

Fresh food items are safely stored in the "LM" and "2T/LM" option which has two temperature zones. SIELAFF's "Food-Safety-Software" monitors the temperature in the LM-area and ensures that only perfectly chilled products are dispensed. This is achieved by a strong, low-maintenance chiller unit.

Highly-efficient insulation provides optimum cooling even in times of climate change and high temperatures even in Europe.

The chiller unit also has a heating function ("Frost monitoring function") which keeps the internal temperature above 0 °C.

**Dependant on site conditions there may be some variations, avoid direct sunlight*

Seasonal fruit and vegetables can be dispensed e.g. or ready meals and more by the SiLine® Outdoor

Sell both food and non-food goods, hygiene products etc.

Offer a range of suitable items when the shop is closed.

Simple as a Smartphone

The current generation of customer interface using touchscreen extends throughout the whole SiLine® machine range. Smart, intuitive the menu guides the customer comfortably through the whole purchasing process.

Additional features such as essential consumer information (e.g. ingredients, allergens) as well as the insertion of advertising banners, will impress your customers and increase your turnover.

The trolley function, available throughout the SiLine®-Line range, enables the bulk purchase of up to five products in one transaction. With the deal function, up to ten multiple items can be selected as a menu offer. On-site sales are increased by offering appealing combinations from the product portfolio.

Sustainability Outdoors

To prevent the machine heating-up, the Outdoor range housing is white as standard.

This colour reflects solar radiation effectively and keeps the temperature lower inside the machine. The LED-illumination inside the machine saves energy and the brightness is freely adjustable. Every component contributes towards enhanced sustainability in Outdoor Vending.

In every stage of production sustainability is key. Sielaff's production methods focus on environmentally-friendly manufacturing and recyclable materials. Our modular concept speaks volumes: Up to 99.7%* of materials used are recyclable.

Innovation sets standards

Sielaff's outdoor machines offer the complete spectrum of modern vending "outside".

Vibrant touch display brings the products to life and with no text required there are no language barriers when making a selection from the machine.

Numerous innovations guarantee the operation of the machine in exposed outside areas, Sielaff places great emphasis on security to combat manipulation and vandalism.

To adapt to the changing weather conditions Sielaff's outdoor machines are available in white as standard as this helps prevent the cabinet from heating up.

Even by selecting white for the housing colour Sielaff again demonstrates its commitment to sustainability and energy efficiency.

Benefit from our strenghts

The Sielaff name is synonymous with operating made easy

The "service-friendly" accolade can be claimed by all our machines: All components are top-quality, well-tested and easily accessible.

The SiLine® Outdoor machines are easy to fill. Even the pusher containers with ergonomically-separated shelves can be pulled out by hand with little effort. The upper shelves tilt down for easier re-filling, in SiLine® GF and SiLine® Snack & Combi machiens alike.

SiLine® stands for Individuality, Variety, Flexibility and Success.

Whether in white, silver or black, with bespoke branding or without: The products which can be sold from the SiLine® Outdoor are as diverse as the product range. Take advantage of the versatility of the SiLine® out-door vending machines.

Genuine Outdoor machines provide sustainable success whatever the product type

Security on site is key

SiLine® Outdoor machines are equipped with all the high security features of the Public Series. This ensures security in high turnover locations, in public spaces with high footfall and usage. Effective protection from break-ins, vandalism and manipulation.

Extremely well equipped the Outdoor specification boasts impact and hinge protection, tamper-proof coin insert slide and coin return drum as well as locking lever protection and side protection frame with additional side lock to resist attempted break-ins – ideal for all types of public locations.

Sielaff vending machines are best suited for all kinds of sites and weather conditions.

Gentle and safe –delivery by lift

The SiLine® series features the right machine variant for each product type.

Standard in cold drinks machines, optional in spiral and combi vending machines: a lift.

Correct product handling is always guaranteed with lift delivery. Whether large or small – the lift in the SiLine® GF and Snack & Combi machines provides gentle, safe product transportation. Typical Sielaff: the lift is smart, innovative and silymly ingenious. In the SiLine® Outdoor range the lift is included as standard.

SiLine® Outdoor – ready for all weathers, just provide electricity

SiLine® GF L RO in Standard colour RAL 9010

SiLine® Snack & Combi M RO in Standard colour RAL 9010

Sielaff: For sure "Made in Germany"

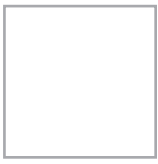

Benefit from our quality promise, which applies to every machine which is produced at Sielaff: Total reliability, extremely low maintenance and long service life.

An overview of the advantages

- Rain roof and weatherproof protection
- Impact protection (Standard 12 mm PC)
- Laminated safety glass with UV-light filter (ESG safety glass)
- Reinforced wavy locking lever protection (5 mm stainless steel), the wavy profile prevents prising or lifting
- Coin insert slide and coin return drum
- High security frame with side lock and CES mortice lock (KESO as an option)
- Residual current circuit breaker
- Chiller unit with heater ("Frost monitoring function", which keeps the internal temperature above 0 °C)
- Rear wall (Branding opportunity)
